In Numbers.....11

A diagonal photograph showing several hands holding beer glasses filled with golden beer and white foam. The image is set against a dark teal background that covers most of the page. The photograph is cut diagonally from the top-left to the bottom-right.

At 71 Brewing we are creative, flavour-first brewers. We use the very best ingredients, sourced as locally as possible, to deliver great-tasting beers. Our hearts are in Dundee, but our eyes are to the world.

THE FRUITS OF OUR LABOUR

We are a knowledgeable, passionate team of brewers, driven by curiosity and creativity in our endeavour to bring brewing back to the city at scale; 71 is the first operational brewery in the city in 50 years.

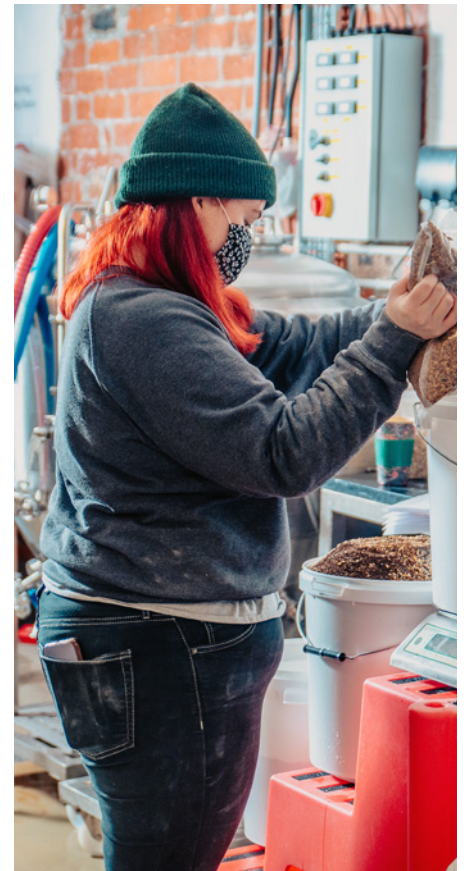

We want to grow, but we want to grow well, so we are building sustainable models for the production and distribution of our beers from the offset.

That means investing in carbon capture technology so that our CO₂ is generated by the production process itself, and in heat recapture systems from the brewing process, so that the large, disused ironworks which we have re-imagined and repurposed as a brewery, tap-room, gallery and arts event space heats itself. Along with our fully electric delivery fleet, we've put ourselves well on our way to our target of net zero by the end of 2025.

And we're growing, currently delivering 10kHl per annum on a brewing footprint scalable to 15kHl, we're investing in people and the resource we need to further build our production capacity over the year ahead.

Our reward is seeing more and more people enjoy our award-winning beers as they become available throughout the UK and internationally through a growing distribution footprint in multiple grocers, independent retail, the on trade, online and in key international markets.

We hope you enjoy our beer as much as we are enjoying making it!
